DETAILED ACTION

Allowable Subject Matter

Claims 1-2 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reason for allowance of the applicant's invention are the structural relationships between the handle and the hinge attaching the handle to the frame shaft rod, while separating the upper and lower handle portion allowing the handle to rotate and also, the lower portion of the handle including a elongated guide bore and a roller inserted in the guide bore. Patroni, jr. teaches a guide bore disposed in a handle portion, and Lindsey teaches a handle hinged at the shaft of a bicycle frame, however, Patroni, Jr. can not be modified by Lindsey in order to provide a lower handle portion with a guide slot hinged at the frame shaft rod separating the upper and lower handle portions, without destroying the references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Norton teaches a bicycle propelled by hands and feet. Eckel teaches a bicycle having handle with a slot disposed in the lower portion. Sink teaches an exercise cycle. Seol teaches a bicycle having a one-way clutch and ratchet gear configuration. Tsuchie teaches a bicycle having a one-way clutch and ratchet gear configuration. Chang teaches a bicycle having a one-way clutch and ratchet gear configuration. Grigoriev teaches a handle-propelled bicycle. Porter teaches a handle propelled exercise bike. Cosgrave teaches a hand and foot powered cycle.
